

4/16/70

Dear Dick,

I had two negatives made. This is the one I didn't get printed. When you print it, I'd appreciate a print.

In order not to color your thinking, I say nothing about what I see. I do not even identify which is which, although I think you will have no trouble distinguishing.

Please, no mention, no discussion, no hints, nothing to anyone. Howard has agreed with me. He will see it here.

If you have any comments, please make them separately. Just return the negative and picture as soon as you can, and see to it that your photographer ~~if~~ this will require that you be in the darkroom with him. If you cannot do that, then return it to me, I'll have it printed and send you the print.

keeps no copies, doesn't even study this. You'll have to be "in a hurry".

There is, of course, considerable difference in the exposures and the angles also differ.

There is little else new. On the Skolnick matter, I keep getting dribblets, all consistent with what we both believe, all bad. I'll try and keep you posted, but it will not be possible to do this in detail. I do have plans. Whether I can accomplish them remains to be seen.

Best,
